Can you please forward final 226 Radium data to Ralph soonest.

Thanks,

Hi Rich,

Attached is the data tabulated in draft spreadsheet form. Hopefully this will do the job for you. I took a quick look at the data again and saw nothing that jumped out.

Ralph

Thanks, that should be very sufficient. I won't be able to call in either, but can pass on the data....

Rich

I won't be able to make the call but I will work on getting you some input on the RAD data if I can get my computer to start functioning.

If you won't mind... there is going to be a conference call tomorrow morning at 10 am. If you could fit it in, I think it could really help things out...

Rich

We did take a look at the RAD data and found nothing of interest. Everything was below drinking water criteria as I recall but I can check again.

Ralph, I kind of forgot about your assessment of the rad data from Dimock. Did you ever get all the data and review it? If so what were your thoughts?
